

## U-Max™ GLAZING ADAPTORS & CHANNELS

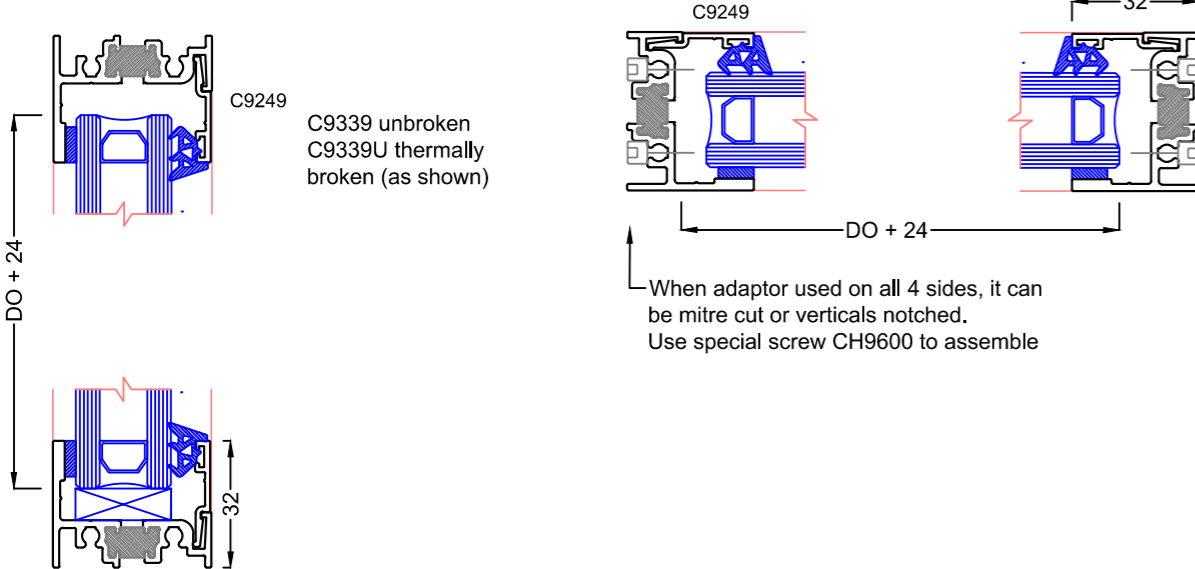

### Glazing Adaptors: UGA - 1

#### 40mm Bead & Base

Available unbroken or thermally broken.  
Accepts 24 - 28mm IGU & integrates with 40mm base glazing channel where frames can be screw assembled.  
Other bead options allow it to be used with 6mm glass upwards.  
Usually silicone glazed when used with channels or as an adaptor, single sided foam tape & wedge may be used.

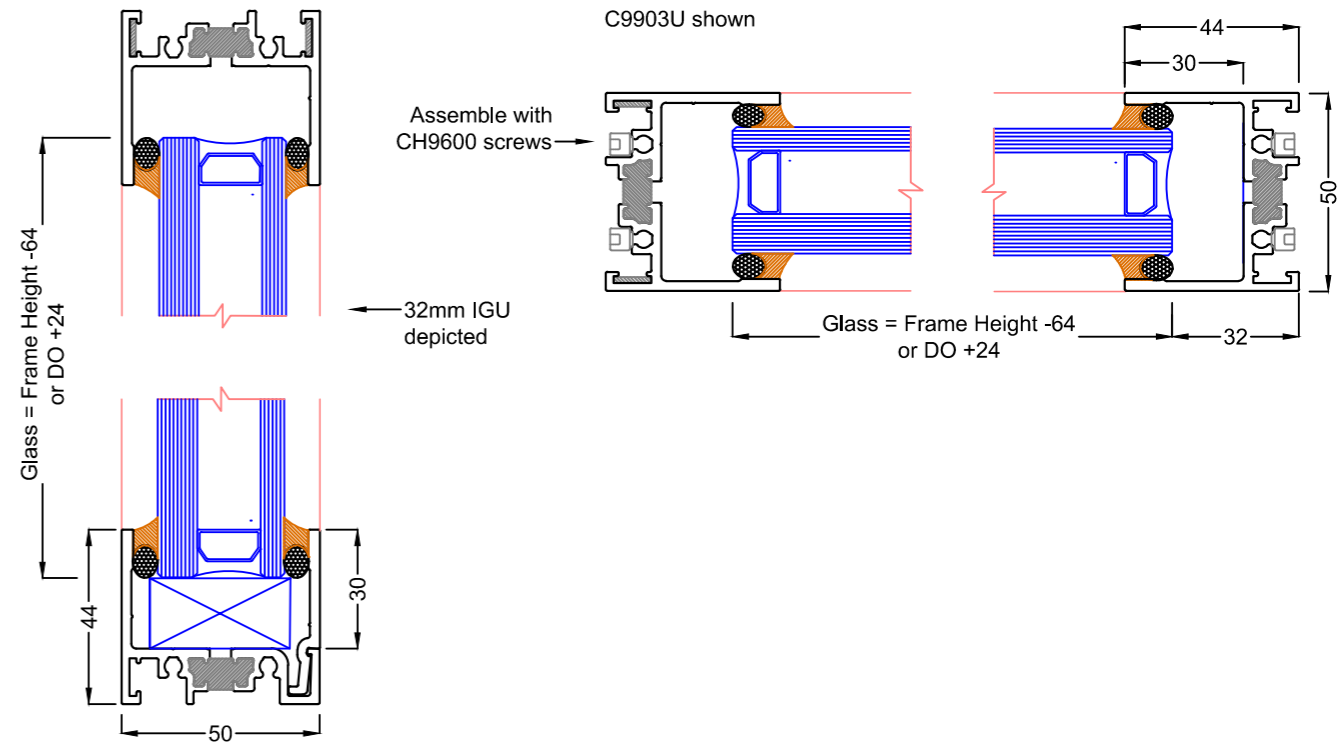

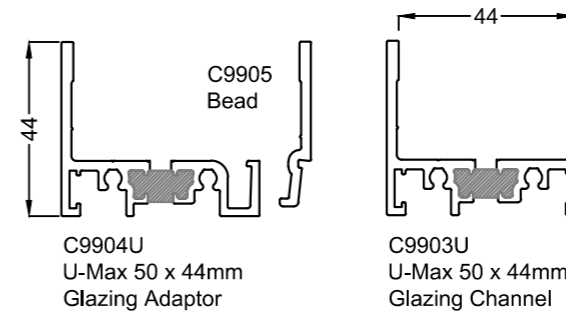

C9339 unbroken  
C9339U thermally broken (as shown)

#### 50 x 44mm Channel & Adaptor

Available Unbroken or Thermally broken.  
Accepts 24 - 36mm IGU Silicone glazed.  
Versatile & can be used in combination with channel & adaptor.  
Frames can be screw assembled using channel on 3 sides & adaptor & bead on one.  
It is the most economical way to manufacture, mitre cutting where shown, & notching to suit the adaptor on one side. The bead can be at the top or bottom.

**U-Max™ GLAZING ADAPTORS & CHANNELS**

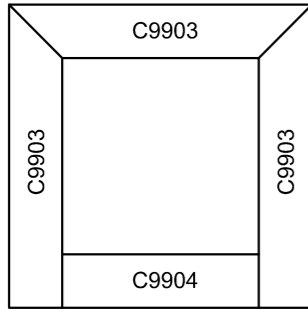

**Glazing Adaptors: UGA - 2**

**50 x 44mm Channel & Adaptor**

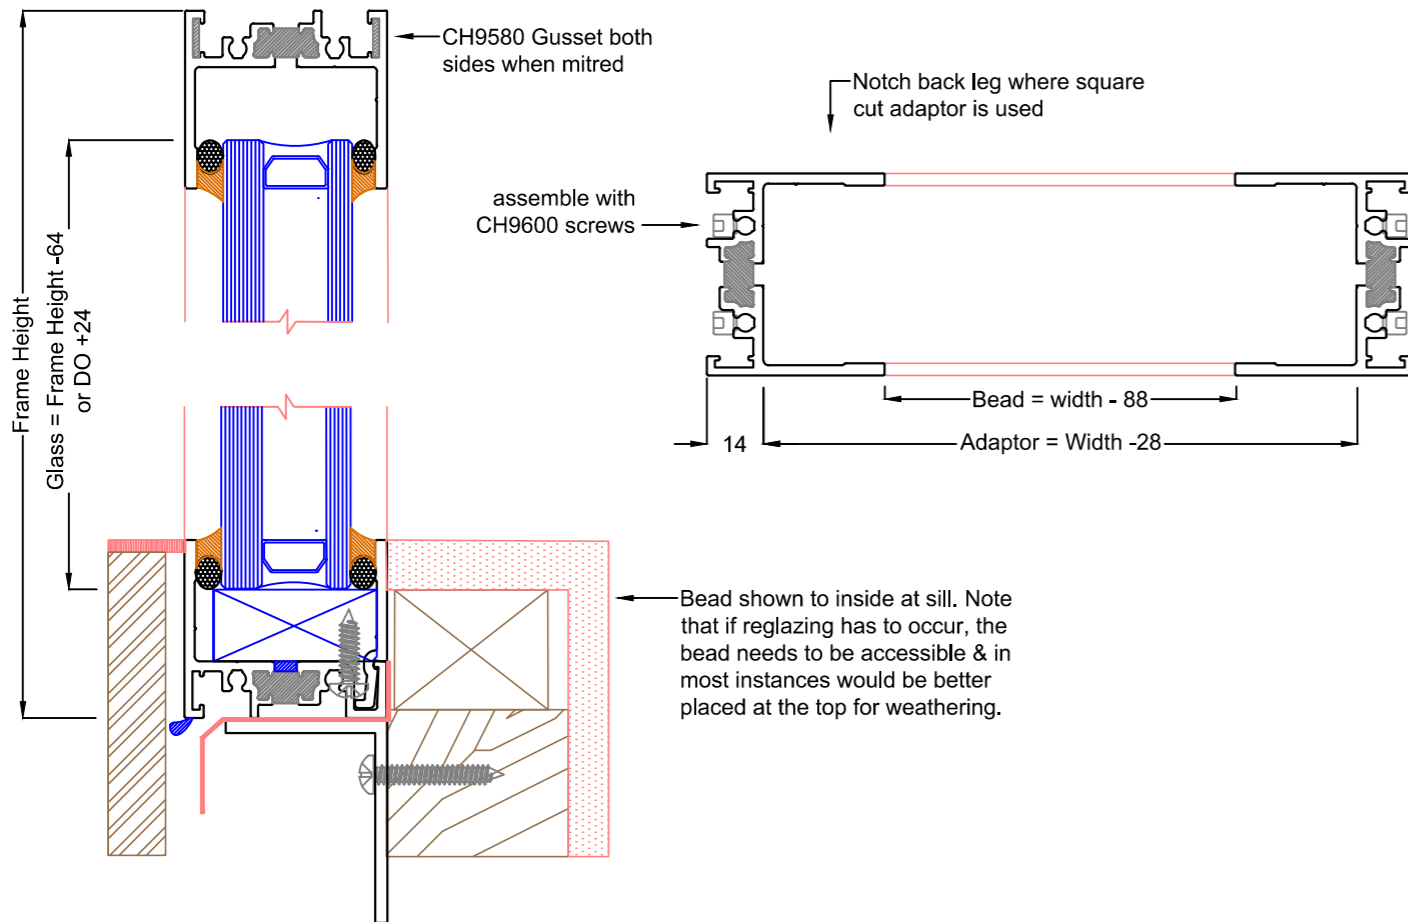

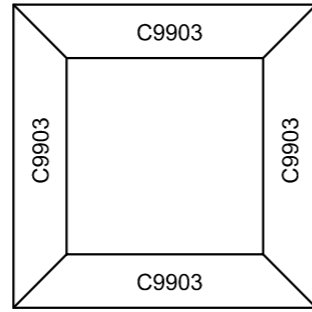

Ideal product in applications where fixed frames are recessed into walls.

Usually with channels a single fixed frame requires a silicone butt to glaze, this arrangement does not require it.

C9904 Adaptor square cut & C9903 mitred on opposing side

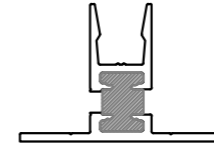

C9904 Adaptor can be used all 4 sides & mitre cut.

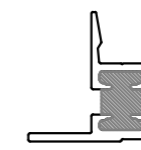

**Back Adaptor with Front Cap**

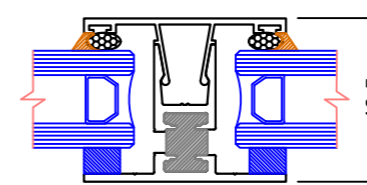

Front Capped adaptors are popularly used to fix off a framed structure, whether that is steel, aluminium or timber. It is often used for simple roof glazing.
